

5 AMAZING FACTS ABOUT YOUR NEW LED LAMP

- + The first 60W incandescent-equivalent A19 LED lamp to be ENERGY STAR® qualified
- + Lasts 25x longer than traditional incandescents
- + Emits virtually no UV/IR light, less heat generated
- + Colour spectrum does not attract flying insects
- + Environmentally friendly, contains no mercury and uses 75% less power

5 FREE ENERGY CONSERVATION TIPS

- + Turn off your monitor when not in use, even if it's just for 15 minutes — your monitor uses up to 75% of the energy powering your computer.
- + Make use of the sun — if your lights can be controlled separately, turn them off whenever there is enough natural light available.
- + Adjust blinds to deflect heat in the summer, and keep heat in during the winter.
- + Unplug chargers for laptops and cell phones when they are not charging.
- + Wash laundry in cold water for up to 90% energy savings, and hang to dry to achieve even more savings.
